User Guide
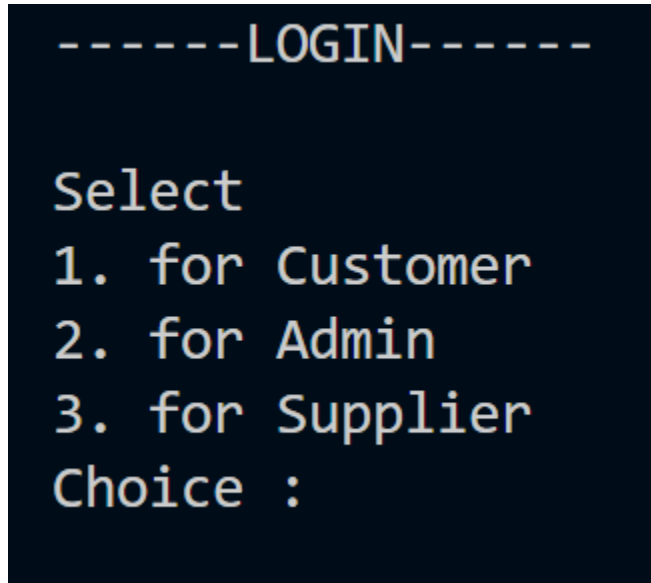

Step 1 :

On the first screen we are required to select from 3 choices, that are, Login, Register, and Exit.

Step 2 :

In Step 2, we are asked to select if we are logging in as a customer or an Administrator or a Supplier.

```
------LOGIN------

Select
1. for Customer
2. for Admin
3. for Supplier
Choice :
```

In the register screen we can only register as a customer.

Step 3 :

In the login screen we are asked the required details:

Customers :
Username, Password
Administrator :
Admin ID, Admin Name
Supplier :
Supplier ID, Supplier Name

In the register screen we are asked to enter the required details:

Customer ID, first name, last name, username, password, contact info

After registering, we are again asked to login.

Step 4 :

If the login details we entered matches that in the database, we are logged in the eCommerceStore.0 application.

We have different functionalities available for different types of users in the application.
Suppose we have logged in as a Customer,

We have these to choose from the following functionalities :

View Cart, Edit cart, Adding product to Cart, View products, View Category, Add Card details, Edit Card details, View available coupons, Apply a coupon to the cart, Place order, View order details.

Logging in as an Administrator :

View Customers, View Products, View Suppliers, Modify Coupons, View Details of Delivery Section, View payment Details.

Logging in as a Supplier :

Add New Products, Modify product Name, Count, Price, Description and Stock.

Step 5 :

After successfully doing a function, we are again brought up to the Step 1 where we are again asked to select from 3 choices, that are, Login, Register, and Exit.
